

ROVER COOL

CORPORATE PROFILE

Your Premier Source for Air Conditioners,
Spares, Farming Essentials, and Building
Materials in the UAE

Who We Are

As a premier general trading company based in the United Arab Emirates, we specialize in providing top-quality HVAC and Cleaning Products. Our unwavering commitment to outstanding customer service and expert advice has established us as the go-to partner for our clients. Offering an extensive array of products sourced from renowned manufacturers, we proudly serve as the authorized distributor for leading brands such as Johnson Controls, Napco Solvent Cement, Liya Cleaning Chemicals, MeBright, AluBright, and AC Bright. Our dedicated team works diligently to ensure the prompt delivery of high-quality products and exceptional customer support for all our valued clients.

AUTHORIZED DISTRIBUTOR

Honeywell

OUR COMPANY

ROVER COOL General Trading is a Sole Proprietorship L.L.C. and a leading provider of HVAC, building materials, and agricultural tools and accessories in the United Arab Emirates. Our company was founded in 2020 in Al Ain, UAE, by a team of industry experts with a vision to become the most trusted supplier of quality products in the market. Since then, we have expanded our operations to Abu Dhabi, UAE, to cater to the growing needs of our customers in the region.

At ROVER COOL, we understand that our customers have unique requirements when it comes to their HVAC, building materials, and agricultural tools and accessories. Therefore, we offer a wide range of products from leading manufacturers, such as Daikin, Siemens, and Honeywell, to cater to their specific needs. Our team is committed to providing exceptional customer service and expert advice to ensure our customers' complete satisfaction.

Our mission at ROVER COOL is to be a trusted partner for our clients, providing them with the tools and resources they need to succeed. We strive to provide our customers with the best HVAC, building materials, and farming accessories on the market, offering expert advice and support to ensure their complete satisfaction. Our vision is to be the ultimate one-stop-shop for all of our customer's needs, offering a vast and constantly-evolving selection of products and services at competitive prices, delivered with exceptional speed and efficiency.

In addition to our broad range of products, we are also the authorized distributor of Johnson Controls, Napco Solvent Cement, and Honeywell Refrigerant, offering market-advantage pricing to our customers. We also provide customized orders to meet our customers' specific needs and requirements. Our team works tirelessly to ensure timely delivery and excellent customer support to all our clients.

At ROVER COOL, we pride ourselves on our values of innovation, responsiveness, optimization, integrity, customer focus, and teamwork. These values drive our culture and define how we operate as a company. We are committed to fostering a positive work environment for our employees, ensuring they receive the necessary training and support to provide the highest level of customer service.

In just a short time since our inception, we have achieved notable milestones by opening a new branch in Abu Dhabi within the second year of starting. This achievement is a testament to our commitment to providing the best products and services to our customers. We are proud to serve a diverse range of customers, including residential, commercial, industrial, and governmental entities, and we look forward to continuing to grow and evolve to meet their needs.

R410A

HFC

R410A, a specialized HFC blend for R22 replacements, works well in dedicated systems, with smaller components and higher pressures. Not suitable for retrofitting R22 systems, it's ideal for domestic and light air conditioning. Its low glide factor is advantageous in centrifugal compressors and low-temperature applications. R410A is an efficient, versatile, and eco-friendly refrigerant for modern cooling needs.

R134A

HFC

R134a, a versatile and eco-friendly HFC refrigerant, revolutionizes cooling solutions. It efficiently replaces R12 systems, enabling compact components in domestic and light AC units. Its stable temperature features suit various applications, from auto AC to household refrigeration. R134a's compatibility and eco-friendliness make it a top refrigerant choice, blending efficiency, adaptability, and sustainability in cooling tech.

R404A

HFC

R404A, a specialized HFC blend, is unsuitable for retrofitting R22 systems due to its unique pressure requirements. However, it excels in industrial and commercial refrigeration, thanks to its ability to work with smaller components. Its versatility shines in low-temperature applications, making it a compelling choice for various cooling needs. R404A combines component optimization with proficiency in low-temperature scenarios, making it pivotal in refrigeration.

R407C

HFC

R407C is a versatile HFC refrigerant, ideal for replacing R22 in modern applications. Its moderate operating pressures allow easy retrofitting of R22 systems. Its compatibility with existing infrastructure makes it a practical choice for upgrading older systems. It performs well in domestic and commercial cooling applications, offering reliability and environmental responsibility. R407C is a balanced and effective refrigerant option.

SUSTAINABILITY STRATEGY

At ROVER COOL, sustainability is a core value that informs everything we do. We are committed to minimizing our impact on the environment by implementing initiatives that reduce our carbon footprint and waste. We also promote social sustainability by creating a diverse and inclusive workplace and supporting local community initiatives and charities. Our sustainability strategy is based on the belief that responsible and sustainable business practices are essential for the long-term success of our business and contribute to the economic and social sustainability of our communities. We continuously evaluate and improve our sustainability practices to ensure that we are doing our part to create a better future for everyone.

At ROVER COOL, we take sustainability seriously and believe responsible and sustainable business practices are essential for our company's success. We've implemented initiatives to minimize our impact on the environment, such as reducing our carbon footprint and exploring renewable energy options.

We're also committed to reducing waste and have implemented a comprehensive waste management program that includes recycling and waste reduction measures. Additionally, we work closely with our suppliers to ensure they share our commitment to sustainability.

Our sustainability management strategy also includes promoting social sustainability by creating a diverse and inclusive workplace and supporting local community initiatives and charities. At Rover Cool, we believe that sustainability management is necessary for the long-term success of our business and contributes to the economic and social sustainability of our communities.

Breathe, Work, Grow Workspace Agriculture

Why should we consider having Gardens inside our Corporate Office?

"Breathe, Work, Grow: Workspace Agriculture"

Encapsulates the essence of our innovative approach to corporate office design. Consider having gardens inside your corporate office because they are not just spaces but dynamic environments that empower your employees to breathe in creativity, work with heightened focus, and grow both personally and professionally. Our gardens are proven to boost productivity, reduce stress, and enhance overall well-being. They signal a commitment to sustainability, projecting a positive image that resonates with clients, partners, and top talent. In these tranquil settings, creativity flourishes, fostering collaboration among your team. By embracing workspace agriculture, you create a unique, employee-centered environment that attracts and retains the best talent while contributing to energy efficiency and eco-friendliness.

What can we do?

-  Tailored Green Sanctuaries
-  Improving Air Quality
-  Our operational process includes several crucial steps:
 - » Client Objective Clarification
 - » Budgeting
 - » Site Assessment
 - » Concept Development
 - » Greenery Selection
 - » Hardscaping
 - » Civil Works
 - » Plant Maintenance Schedules
 - » Interior Decor and Refurbishing
